

Dialysis Clinic, Inc.

A Non-Profit Corporation

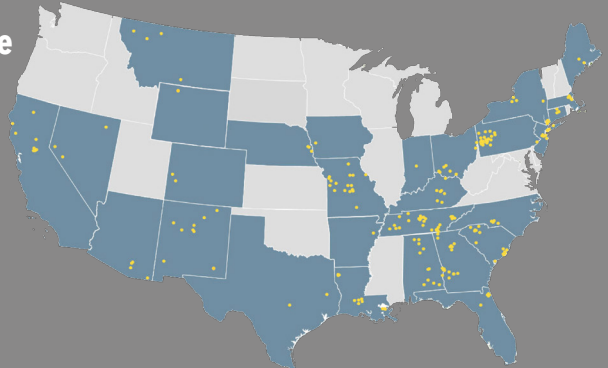

We are a **non-profit** service organization.

The care of the **patient** is our reason for **existence**.

THE DCI STORY:

Dialysis Clinic, Inc., has been serving people with kidney disease since 1971. As the **largest non-profit dialysis provider in the U.S.**, we provide life-saving therapies to approximately 15,000 patients in more than 230 clinics across 28 states, including 100 hospital locations.

Our patient-centered approach is what sets us apart. In addition to providing all dialysis treatment options, we operate DCI Donor Services to increase access to transplantation. We also operate Reach Kidney Care, our **chronic kidney disease education** program, to provide preventative education, resources, and care coordination **before, during** and **after** kidney failure.

We serve approximately **15,000** patients with kidney disease and employ nearly **5,000** Americans.

We have the **lowest mortality and hospitalization** ratios among large dialysis providers since 2003. (USRDS)

We've provided more than **\$200 million** to research and education initiatives in the kidney care field.
